Improving Efficiency Through Expert Building Operations Services

Havel offers customized, comprehensive building operations services (BOS) designed to meet the requirements of today's high-performance, energy-conscious businesses. Our flexible BOS options can help enhance the longevity, productivity, and performance of your facilities.

Professional Service for Complete Building Needs

Our highly-trained technical engineers maintain some of the most sophisticated facilities in the region. They have the experience and know-how to assess your facility's workload, right-size your maintenance staff, and help maximize efficiency.

We can also help you identify ways to more effectively manage your HVAC, automation, and data center needs.

Custom Service Solutions

At Havel, we specialize in plant automation, data center control, remote building monitoring, and retrofitting of obsolete equipment. In addition, we can provide a full range of facility management services such as janitorial, mail room, and snow removal. Your BOS program can be customized to fit your specific needs.

Additionally, we offer the benefits that come with being a member of EMCOR Group, Inc, allowing you to bundle a vast array of services to maximize savings and ensure quality and value.

Supporting Your Business Goals

A BOS plan with Havel helps deliver:

- » The reliability of a single-source contact for all your facilities services
- » Reduced energy consumption
- » Brand-neutral capabilities to service all your systems
- » Cost-containment and visibility of all facilities spend
- » Opportunities to free up valuable general fund dollars
- » Potential to apply more of your budget to other critical business operations

We're ready to support your essential building operation needs.
